

DHIALI CHETTY

Interactive developer / Interactive designer

ABOUT ME

I'm a 20-year-old third-year User Experience (UX) and second-year Interactive Development student with a passion for creating intuitive and impactful digital experiences. My dual focus allows me to bridge the gap between design and functionality through user-centered design and creative coding.

At Open Window Institute, I've gained practical skills in user research, wireframing, prototyping, front-end and back-end development and collaboration. I'm proficient in tools like Figma, HTML/CSS/JavaScript, Adobe Suite and GitHub.

Through my studio, Dhiali Digital Designs, I specialize in UX/UI design, branding and full-stack web development. I'm driven to build digital solutions that are both innovative and user-focused.
